Official Patient Summary Report

Patient Name: Sahil Khaire

Visit Date: 2026-02-21

Patient ID: P-5382

Doctor: Dr. Smith

YOUR HEALTH SUMMARY

You have been diagnosed with Hypertension (high blood pressure), which means your blood pressure is higher than normal. This can increase your risk of heart disease and stroke. Don't worry, we can manage this with medication and lifestyle changes. You have been prescribed Amlodipine to help lower your blood pressure, and we recommend a low-salt diet and regular follow-ups.

CLINICAL DETAILS

Subjective:

You reported a mild headache.

Objective:

Your blood pressure was 145/90.

Assessment:

You have Stage 1 Hypertension.

Plan:

We will start you on Amlodipine 5mg, recommend a low-salt diet, and schedule a follow-up in 2 weeks.

DIAGNOSES

- Hypertension (ICD-10: I10) - High blood pressure (a condition where the blood pressure in your arteries is consistently too high)

ALERT STATUS: GREEN

MEDICATIONS

Medication	Dose	Frequency	Duration
Amlodipine	5mg	Once daily	30 days
Note: Take in the morning with water			

FOLLOW-UP: 2026-03-07
